PROFESSIONAL SUMMARY

Fresh graduate in Informatics and Computer Engineering Education from Universitas Sebelas Maret (UNS) with hands-on experience in full-stack web development and applied machine learning, including thesis research on multilingual SBERT for automated essay scoring. Experienced using PHP, JavaScript, Java, and modern database design, backed by a BNSP Junior Web Programmer certification and industry internship experience at Diskominfo.

TECHNICAL SKILLS

Languages: Python, PHP, Java, JavaScript, TypeScript, Dart
Frameworks & Libraries: Laravel, React, Next.js, Node.js, Express, Tailwind CSS, PyTorch
AI/ML: NLP, SBERT, Computer Vision, OCR, CRNN, MediaPipe
Databases & Tools: MySQL, PostgreSQL, Git, Postman

PROFESSIONAL EXPERIENCE

Student Teacher | SMK Negeri 3 Surakarta *Sep 2025 - Dec 2025*

- Taught Informatika and KKA (Koding dan Kecerdasan Artifisial) across 6 classes (~200 students), delivering logic programming lessons using Python and Scratch.
- Prepared lesson plans, hands-on coding exercises, and assessments; adapted materials for students with varying levels of programming experience.

Web Developer Intern | Diskominfo Kota Madiun *Jan 2025 - Feb 2025*

- Developed a Laravel-based inventory management system to replace manual recording of incoming and outgoing warehouse goods, consolidating separate recording steps into a single dashboard used by warehouse staff.
- Built inventory tracking and procurement request features; staff reported faster stock checks and easier goods tracking compared to the previous manual process.

ACADEMIC PROJECTS

Automated Essay Scoring (AES) System | Undergraduate Thesis, UNS

- Built an AES system for Indonesian student essays using multilingual SBERT and hybrid scoring, comparing three transformer models via fine-tuning and 5-fold cross-validation.
- Achieved 94.70% accuracy and 0.947 F1-score with the best-performing model.

OCR System for Image-Based Text Recognition | Personal / Academic Project

- Built an OCR pipeline using CRNN and Self-Attention with PyTorch, including image augmentation for robustness.
- Evaluated performance using Word Accuracy, Character Error Rate (CER), F1-Score, and confusion matrix analysis.

Informatics Engineering Lab Management System | Personal / Academic Project

- Built a Laravel 11 inventory and equipment-loan system with separate admin and student portals for stock management and borrowing requests.
- Implemented letter validation and request-tracking features to streamline lab equipment borrowing workflows.

ORGANIZATIONAL & VOLUNTEER EXPERIENCE

- PKKMB UNS - Coordinated logistics and operations, including equipment, transportation, and consumption across divisions. *(2023 - 2024)*
- Bytesfest - Logistics Volunteer *(2023)* and Documentation Volunteer *(2024)*. *(2023 & 2024)*
- PORSEMA UNS - Supported logistics and on-site event operations. *(August - October 2023)*

EDUCATION

S1 - Pendidikan Teknik Informatika dan Komputer | Universitas Sebelas Maret (UNS) *Aug 2022 - July 2026*

- GPA: 3.82 / 4.00 | Thesis: Automated Essay Scoring for Indonesian Essays Using Multilingual SBERT and Hybrid Scoring

CERTIFICATIONS

- BNSP - Junior Web Programmer, LSP Universitas Sebelas Maret (Feb 2026) *Feb 2026 - Feb 2029*
